CAREER OBJECTIVE:

To obtain a challenging position in a reputed organization where I can effectively utilize my resourceful skills that will add value to the organization.

PROFESSIONAL SUMMARY

- I have 3 year of total experience ,
  1 year experience in python & ML as a full time employee in CyntraLabs Pvt ltd.
  1 year experience as an intern in head field solution in the field of data science.
  (Machine learning and Deep learning using Python including Natural Language.
  Processing (NLP)).
  1 year experience in ecommerce based clothing company(sastakharidLo in 2021).
- Hands on CNN, RNN, LSTM model.
- Hands on Scraping.
- Hands on different Deep learning frameworks like Pytorch, Tensorflow.
- Analyzed and visualized data using matplotlib ,seaborn and other data analysis libraries.
- Good listening and communication skills and efficient to work in a consulting environment.

Work Experience:

Company:Cyntralabs
From: july 2022
Project: Chatbot for Sentimental Analysis Tool.

Responsibilities: -

- In this project I have created a deep learning model for Chatbot using Tensorflow with RNN and LSTM model.
- I have used NLP for data cleaning and data normalization, for user input and output, for tokenization of words and to find out the correlation between words of input and output.
- I am also working to create multiple scraping scripts to scrape data from social platforms for our tool to find out the sentiment using CNN.

Company: Head Field
From: Dec 2019 to 2020
Projects: - Predictive & Statistical modeling.

Responsibilities:

- In this project use of Machine Learning Algorithms such as Linear Regression, Logistic Regression, Decision Tree and ARIMA time series modeling.
- This project deals with different types of problems in the Financial industry including Investment, Production and Market.

- Prepared several analytical reports comprising different data modeling techniques such as time series analysis, financial modeling and trend mapping.
- Worked on Data Cleansing and Normalizing using Python Lib. such as ScikitLearn, Data Management and Data Processing techniques like extracting, concatenating, Modelling, sub setting and Duplicate records using Pandas.

SKILLS

- **Language**:-

  Python,Machine

  Learning, Deep Learning,

  Pandas,Numpy,NLP,SQL.

- **UI/Database**: HTML, CSS and MySQL.

- **Data Visualization:** Matplotlib, Seaborn, Plotly.

- Strong Analytic skill

INTER-PERSONALSKILLS:

- Self Confident
- Ability to work in a team.
